IDENTIFIERS	*Hawaii; Stopouts

ABSTRACT

This report analyzes characteristics of students who entered Hawaii community colleges in fall 1975 and re-enrolled in spring 1978 for the sixth consecutive semester, and compares these continuing students to non-continuing students in terms of sex, age at time of entry, marital status, high school background, full- or part-time status, educational objectives and programs, grade point average (GPA), and credit-completion ratios. There were statistically significant differences in continuation rates for the following characteristics: age, entry status, full- or part-time status, GPA, and credit-completion ratios in the second semester; GPA and credit-completion ratios in the third and fourth semesters; and credit-completion ratios in the fifth semester. By the sixth semester, there was no characteristic common to all seven campuses. Further, campuses differed significantly in continuation rates for the second through fourth semesters but not for the fifth and sixth. Generally, students with the highest continuation rates were over 29 years of age at entry, new students as opposed to transfers, full-time students, and students with GPA's of 2.0-3.4 and with credit-completion ratios of 1.0. The continuation rate for all campuses was 76%; however, stop-outs numbered 580, about 100 more than in the previous fall. Eight data tables are included. (TR)

A. Introduction

1. Nature of This Report

This report is an analysis of the characteristics of students (Fall 1975 Entering Students, only) who were enrolled in our colleges in Spring 1978 for *their sixth consecutive semester.* These continuing students are compared to those who are not currently enrolled. (Student Flow Reports 10, 16, 23 and 34 analyzed the characteristics of those continuing and not continuing during the Spring 1976, Fall 1976, Spring 1977 and Fall 1977 semesters.) Our results are based on the data in the University of Hawaii's student files.

This comparison of continuing and non-continuing students includes analysis in terms of the following ten characteristics:

—personal: sex, age at time of entry, marital status

--academic: high school background, Fall 1975 entry status and Fall 1977 characteristics: full-/part-time status, educational objective, program, grade point average and credit-completion ratio.

Findings on continuation rates are summarized in two sections: (a) for the community college total and (b) for each campus, by program.

2. Definitions: Registrants, Continuers, Stop-outs

The term registrants as used in this Student Flow Project is a general one, applicable to all Fall 1975 entering students enrolled in the current semester. Registration rate is derived by dividing the number of registered students by the number of potential registrants (total entering students minus non-returning graduates).

There are two kinds of registrants: "continuers" and "stop-outs". The terms are further defined below.

The term continuers is defined in this report as those students (Fall 1975 entering, only, for this report) who have attended all semesters since Fall 1975 without interruption. The continuation rate is calculated by dividing the number of students enrolled continuously since entry by the potential continuing students (total continuers at the end of the previous semester minus number graduating at the end of the semester).

The term stop-outs is defined as those students (Fall 1975 entering, only, for this report) who are registered in the current semester but who had stayed out a semester or two. The number is obtained by subtracting the total number of continuers from the total number of those registered.

Table 1, which presents data in terms of the definitions above, shows a registration rate of 22 percent and a continuation rate of 76 percent. (The comparable figures for the Fall semester were 28 and 67 percent, respectively.)

Stop-outs numbered 580, about a hundred more than last Fall. (This was the largest number of stop-outs in the five semesters following Fall 1975.)

TABLE 1
REGISTRANTS, CONTINUERS AND STOP-OUTS
SPRING 1978

SPRING 1978:

Registrants and Registration Rate		Continuers and Continuation Rate		Stop-outs	
Total Entering Fall '75	8,979	Total Entering Fall '75	8,979	Registrants	1,784
Non-Returning Grads	- 833	Continuously Registered Students, End of Fall '77	1,594	Continuers	-1,204
Potential Registrants	8,146	No. of Continuously Registered Students Enrolled in Sp. '78	1,204	Stop-outs	580
Number Registered	1,784				
Registration Rate 1,784 ÷ 8,146	22%	Continuation Rate 1,204 ÷ 1,594	76%		

Sources: Registration Rate, 2542F, March 6, 1978
Continuation Rate, 2542P4, March 6, 1978

B. Findings: Community College Total

A detailed table showing continuation rates in Spring 1978 for the community college total and by campus is found in Appendix A. The highlights of that table are discussed in this section of our report.

1. Continuation Rates

As indicated above, the continuation rate in Spring 1978 for the community colleges as a whole was 76 percent. Campuses differed in their continuation rates in the five semesters as indicated below:

	Spring 1976	Fall 1976	Spring 1977	Fall 1977	Spring 1978
Community College Total	72%	64%	80%	67%	76%
Hawaii Community College	77%	65%	86%	70%	83%
Honolulu Community College	73%	70%	81%	66%	74%
Kapiolani Community College	74%	64%	77%	68%	75%
Kauai Community College	64%	65%	81%	67%	72%
Leeward Community College	75%	64%	80%	69%	76%
Maui Community College	66%	61%	78%	57%	77%
Windward Community College	67%	50%	73%	65%	68%

Continuation rates were higher at every campus this Spring compared to the previous semester. The rates ranged from 83 percent at Hawaii to 68 percent at Windward. (The range in Fall 1977 was 70 percent, Hawaii, to 57 percent, Maui.)

Our analysis of the community college total also showed that there were statistically significant differences in continuation rates based on all characteristics except sex, marital and high school background. Campuses differed, however, on the characteristics which revealed statistically significant differences in continuation rates. (See Table 2.) *"Significant" items were grade point average for six campuses and credit-completion ratio for five campuses.* Students at Hawaii differed significantly in their continuation rates based on six characteristics; Honolulu, Kapiolani and Leeward, on three characteristics; Maui, on two; Kauai, on one; and Windward, none.

TABLE 2
STUDENT CHARACTERISTICS AND CONTINUATION/NON-CONTINUATION RATES
SPRING 1978

Note: Level of statistical significance is denoted thus: *.05 level, ** .01 level, *** .001 level.

2. Personal Characteristics

a. Sex: *For the community college total, the continuation rate for both males and females was 76 percent.* The continuation rates for females ranged from 83 percent at Hawaii to 64 percent at Kauai; for males from 83 percent at Hawaii to 65 percent at Windward.

b. Age: *There were statistically significant differences in continuation rates, by age groups, for the community college total. The highest continuation rate was for the group over 29 years of age at entry (79 percent), and the lowest rate (63 percent) was for students 22-24 years of age.* The continuation rates for the over-29 age group ranged from 91 percent at Maui to 73 percent at Hawaii.

c. Marital Status: *Students differed significantly by marital status at Hawaii.* The continuation rate for single students was 76 percent for the total and ranged from 90 percent, Hawaii, to 59 percent, Windward; the rate for married students was 75 percent for the total and ranged from 83 percent, Maui, to 64 percent, Honolulu.

3. Academic Characteristics

a. High School Background: *There were statistically significant differences in continuation rates, by high school background, for Hawaii. For the community college total, the highest continuation rates were for the groups who graduated from public Neighbor Island high schools (80 percent). Students who graduated from U.S. Mainland/Possession high schools had the lowest continuation rate (66 percent).* At four campuses, Hawaii, Honolulu, Kapiolani and Leeward, the highest continuation rates were found among students graduating from Neighbor Island high schools.

b. Entry Status: *Students differed significantly, by entry status, for the community college total and Leeward.* At all community colleges except Maui, new students had higher continuation rates than transfer students. The continuation rate was 77 percent, ranging from 87 percent at Hawaii to 72 percent at Windward. The rate for transfer students was 68 percent, ranging from 81 percent at Maui to 53 percent at Windward.

c. Full-/Part-Time Status in Fall 1977: *There were statistically significant differences in continuation rates, by full-/part-time status, for the total, Hawaii and Honolulu. For the total and all campuses, full-time students had higher continuation rates than part-time students.* The rate for full-time students was 79 percent for the total and ranged from 90 percent at Hawaii to 75 percent at Windward; for part-time students the rate was 71 percent and ranged from 75 percent at Leeward to 63 percent at Windward.

d. Educational Objective: *There were statistically significant differences in continuation rates, by educational objective, for the total and Kapiolani. Generally, the highest continuation rates were for students seeking A.S. degrees.* This was true for the total (80 percent), Honolulu (76 percent), Kapiolani and Kauai (80 percent, each), Leeward (82 percent), and Maui (81 percent).

e. Program: *There were statistically significant differences in continuation rates, by program, for the total and Hawaii. Technology students had the highest continuation rate (82 percent) for the total, followed by business (81 percent) and hotel/food services (77 percent).* Programs (enrolling at least 26 continuing students) with the highest continuation rates on each campus were not identical.

--Hawaii CC	90%	Business
--Honolulu CC	79%	Technology
--Kapiolani CC	82%	Hotel/Food Services
--Kauai CC	No program enrolled 26 continuing students	
--Leeward CC	85%	Business
--Maui CC	74%	Liberal Arts
--Windward CC	72%	Liberal Arts

If one looks at the number of continuing students, the following programs have the largest enrollments: liberal arts (538) for the total, Leeward (296), Maui (32) and Windward (43); business for Hawaii (26), and Kapiolani (154). In addition to liberal arts, other programs with large numbers of continuing students for the total were business (287) and technology (219).

Among the non-continuing students are 277 who graduated in Fall 1977:[1]

78	liberal arts
106	business
12	hotel/food services
23	public services
58	technology

f. Grade Point Average: *There were statistically significant differences in continuation rates, by grade point average, for the total and six campuses. Those with grade point averages of 2.0-2.9 and 3.0-3.4 had the highest continuation rates, 83 percent each, followed by the group with 3.5 and above (81 percent), and below 2.0 (54 percent).* On all seven campuses, the students with below 2.0 grade point averages had

[1] Computer Report, 2542F, March 1978.

the lowest continuation rates, ranging from 59 percent at Leeward to 42 percent at Maui. The group having grade point averages of 2.0-2.9 had the highest rates on four campuses (Hawaii, Honolulu, Kauai and Leeward).

g. Credit-Completion Ratio: *There were statistically significant differences in continuation rates, by credit-completion ratio, for the total and five community colleges. For the total, the highest continuation rates were for students with CCRs of .90-.99 (93 percent). The group with CCRs under .50 had a continuation rate of 47 percent.* On most campuses, students with CCRs above .60 had the highest continuation rates, and on all campuses the group with below .50 CCRS had the lowest continuation rates, ranging from 52 percent at Hawaii to 15 percent at Maui.

C. Findings: Campus Highlights, by Program

1. Hawaii Community College (85 continuing students; 83 % continuation rate)

Data in Table B-1 cover six programs and unclassified students. The range in continuation rates was 90 percent for business to none for health services majors. Since six of the programs (liberal arts, health services, hotel/food services, public services, technology and unclassified students) had fewer than 26 continuing students, discussion in this section will deal only with students in business, 26 continuing students, 90 percent continuing rate.

There were statistically significant differences in continuation rates, by high school background. Students from public Neighbor Island high schools had a continuation rate of 96 percent.

There were 17 graduates in Fall 1977: 13, business and 4, technology.

2. Honolulu Community College (263 continuing students; 74% continuation rate)

Data in Table B-2 cover four programs and unclassified students. The range in continuation rates was 79 percent for technology to 50 percent (one out of two) for unclassified students. Since the hotel/food services program and the unclassified group had fewer than 26 continuing students, discussion in this section will deal only with students in the liberal arts (69 continuing students), public services (51), and technology (139).

There were statistically significant differences in continuation rates, by the following characteristics and for the following programs:

--full-/part-time	*technology*
--grade point average	*technology*
--credit-completion ratio	*public services, technology*

Honolulu Community College had 68 students who graduated in Fall 1977: 7, liberal arts; 4, commercial baking; 15, public services; 42, technology.

a. Liberal Arts (69 continuing students; 70% continuation rate)

There were no statistically significant differences in continuation rates by student characteristics.

b. Public Services (51 continuing students; 69% continuation rate)

There were statistically significant differences in continuation rates by credit-completion ratios.

Among the students with the highest continuation rates were students with credit-completion ratios of 1.0 (82 percent).

c. Technology (139 continuing students; 79% continuation rate)

There were statistically significant differences by full-/part-time status, grade point averages and credit-completion ratios.

Among the students with the highest continuation rates were:

--full-time students, 86 percent
--students with grade point averages of 3.5 and above and with 2.0-2.9 (90 percent, each)
--students with credit-completion ratios of 1.0 (90 percent).

3. Kapiolani Community College (268 continuing students; 75% continuation rate)

Data in Table B-3 cover five programs and unclassified students. The range in continuation rates was 100 percent (two students only) for public services to 65 percent for liberal arts students. Since three programs had low enrollments (health services, 15 continuing students; public services, 2 continuing students; unclassified students, 5), discussion in this section will deal only with students in liberal arts (61 continuing students), business (154) and hotel/food services (31).

There were statistically significant differences in continuation rates, by the following characteristics and for the following programs:

--high school background	*hotel/food services*
--entry status	*business*
--grade point average	*business*
--credit-completion ratio	*business, hotel/food services*

Kapiolani Community College had 68 students who graduated in Fall 1977: 5, liberal arts; 57, business; 4, hotel/food services; and 2, public services.

a. Liberal Arts (61 continuing students; 65% continuation rate)

There were no statistically significant differences in continuation rates, by student characteristics.

b. Business (154 continuing students; 78% continuation rate)

There were statistically significant differences in continuation rates by entry status, grade point averages and credit-completion ratios.

Among the students with the highest continuation rates were:

--new students (82 percent)
--students with grade point averages of 3.5 and above (96 percent)
--students with credit-completion ratios of 1.0 (89 percent).

c. Hotel/Food Services (31 continuing students; 82% continuation rate)

There were statistically significant differences by high school background and credit-completion ratios.

Among the students with the highest continuation rates were:

--students who had graduated from Oahu public high schools (89 percent)
--students with credit-completion ratios of 1.0 (96 percent).

4. Kauai Community College (41 continuing students; 72% continuation rate)

Data in Table B-4 cover five programs and unclassified students. The range in continuation rates was 100 percent for health services (one student, only) to 38 percent (3 students), unclassified students. All programs had low enrollments, i.e., fewer than 26 continuing students.

Kauai Community College had 17 students who graduated in Fall 1977: 5, liberal arts; 5, business; 2, public services; and 5, technology.

5. Leeward Community College (430 continuing students; 76% continuation rate)

Data in Table B-5 cover five programs and unclassified students. The range in continuation rates was 85 percent for business to 71 percent for unclassified students. Since three programs had low enrollments (hotel/food services, 8 continuing students; public services, 8; unclassified group, 5), discussion in this section will deal only with students in liberal arts (296 continuing students), business (78) and technology (35).

There were statistically significant differences in continuation rates, by the following characteristics and for the following programs:

--high school background	*technology*
--grade point average	*liberal arts, business*
--credit-completion ratio	*liberal arts, business*

Leeward Community College had 84 students who graduated in Fall 1977: 52, liberal arts; 20, business; 4, hotel/food services; 3, public services; 5, technology.

a. Liberal Arts (296 continuing students; 74% continuation rate)

There were statistically significant differences by grade point averages and credit-completion ratios.

Among the students with the highest continuation rates were:

--students with grade point averages of 2.0-2.9 (82 percent)
--students with credit-completion ratios of .60-.69 (88 percent).

b. Business (78 continuing students; 85% continuation rate)

There were statistically significant differences by grade point averages and credit-completion ratios.

Among the students with the highest continuation rates were:

--students with grade point averages of 3.5 and above (100 percent)
--students with credit-completion ratios of 1.0 (92 percent).

c. Technology (35 students; 83% continuation rate)

There were statistically significant differences by grade point averages and credit-completion ratios.

Among the students with the highest continuation rates were those who had graduated from public high schools on Oahu (87 percent).

6. Maui Community College (70 continuing students; 77% continuation rate)

Data in Table B-6 cover five programs and unclassified students. The range in continuation rates was 100 percent for public services and unclassified students (4 and 2 students, respectively) to 67 percent (2 out of 3 students) for health services students. Since five programs had low enrollments (business, 17; health services, 2; public services, 4; technology, 13; unclassified group, 2), discussion in this section will deal only with students in liberal arts (32 continuing students).

There were statistically significant differences in continuation rates, by credit-completion ratios for liberal arts majors. Those with credit-completion ratio of 1.0 had a 92 percent continuation rate.

Maui Community College had 15 students who graduated in Fall 1977: 2, liberal arts; 10, business; 1, public service; 2, technology.

7. Windward Community College (47 continuing students; 68% continuation rate)

Data in Table B-7 cover two programs and unclassified students. The range in continuation rates was 72 percent for liberal arts to 0 percent for business. Discussion in this section will deal only with students in the liberal arts program (43 continuing students; 72% continuation rate).

There were no statistically significant differences in continuation rates for liberal arts students.

Windward Community College had 7 liberal arts students and 1 business student who graduated in Fall 1977.

D. Summary and Conclusion

This section compares the major findings regarding continuing and non-continuing students for the past five semesters: Spring 1976, Fall 1976, Spring 1977, Fall 1977, and Spring 1978. *Two important observations can be made:*

- *Statistically significant differences between continuing and non-continuing students declined as they progressed from one semester to the next.*
- *By the sixth semester, there was no characteristic common to students with the highest continuation rates at all seven campuses.*

1. Significant Differences

a. For the community college total and for each of the seven community colleges, there were statistically significant differences in continuation rates for the following characteristics:

Spring 1976 (2nd Sem.)	Fall 1976 (3rd Sem.)
Age	Grade point average
Entry status	Credit-completion ratio
Full-/part-time	
Grade point average	
Credit-completion ratio	

Spring 1977 (4th Sem.)	Fall 1977 (5th Sem.)	Spring 1978 (6th Sem.)
Grade point average	Credit-completion ratio	None
Credit-completion ratio		

b. Continuation rates for the community college total and for six campuses in Spring 1978 were significantly different, by grade point average.

c. Campuses differed significantly in their continuation rates for the second through the fourth semesters but not for the fifth and sixth semesters.

2. Campuses Differences, by Program

Enrollment in the various programs of the community colleges differs considerably. We set 26 continuing students as the minimum for analysis in this report of program differences.

a. No one program (enrolling at least 26 continuing students) in Spring 1978 had the highest continuation rate on all campuses: business was highest at Hawaii and Leeward; hotel/food services at Kapiolani; liberal arts at Maui and Windward. No program at Kauai enrolled 26 or more students. At Leeward and Windward, the same programs also had the highest continuation rates in Fall 1977.

b. Grade point average and credit-completion ratio continue to be significant in differentiating between continuing and non-continuing students in most programs enrolling at least 26 continuing students. (See Table 3.)

c. Programs on the various campuses differed greatly in the characteristics which showed statistically significant differences in continuation rates. For example, three campuses offered business programs which enrolled at least 26 continuing students: Hawaii, Kapiolani, and Leeward. They differed in the nature and extent of "significant" characteristics. The range: at Kapiolani there were significant differences on three characteristics (entry status, grade point average and credit-completion ratio); at Leeward, one.

3. Profile of Students with Highest Continuation Rates

Generally students with the following characteristics had the highest continuation rates in all semesters:

--students over 29 years of age at entry
--new students (rather than transfers)
--full-time students
--students with grade point averages of 2.0-3.4
--students with credit-completion ratios of 1.0.

4. Concluding Note

The data for the past six semesters show that students who enroll continuously without interruption tend to have certain characteristics in common. The information offers implications for student counseling and academic advising programs.

TABLE 3
STUDENT CHARACTERISTICS AND CONTINUATION/NON-CONTINUATION RATES,

APPENDIX NOTES

1. "Previous total" denotes continuing students at the end of the previous semester, excluding graduates.

2. Continuing Rate = $\frac{\text{number of continuing students}}{\text{previous total (excluding graduates)}}$

3. Levels of significance, based on chi-square analysis, are denoted thus:

   * .05 level ** .01 level *** .001 level

4. Continuation rates are not given if the previous total is under 10.

5. Continuation rates are not presented for students for whom no data are available on a particular characteristic.
